Syntax

Vorlage:Tlc

Full color of diagram palettes. Moving the mouse cursor over each box the color number appears.

Palette	Code	Resulting colors	Note
Category20 Vorlage:Small	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	Normal order
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	The first color is the 3rd
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	Inverted order
Category10 Vorlage:Small	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	Normal order Vorlage:Small
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	The first color is the 2nd Vorlage:Small
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	The first color is the 3rd Vorlage:Small
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	Inverted order
	Vorlage:Tlc	**Lua-Fehler: bad argument #1 to "get" (not a valid title)**	Normal order
	Vorlage:	**Lua-Fehler: bad argument #1 to "get" (not a**	

Palette	Code	Resulting colors	Note
Plotter	Tlc	**valid title)**	Inverted order

The *number of colors* must be from 1 to 20 (*Categ20*) or 26 (*Plotter*).

Show the color number is an optional parameter, with two values: '-' the color number and 'a' with the degree of transparency (alpha channel) added at the end of the number and always it will be 'ff'. It is only interesting to add the color for the map coloring.

Template data

TemplateData
