

## Modul:Sidebar/styles.css

```
/* {{pp-template}} */
/* TODO: Invert width design to be "mobile first" */
.sidebar {
    /* TODO: Ask if we should have max-width 22em instead */
    width: 22em;
    /* @noflip */
    float: right;
    /* @noflip */
    clear: right;
    /* @noflip */
    margin: 0.5em 0 1em 1em;
    background: #f8f9fa;
    border: 1px solid #aaa;
    padding: 0.2em;
    text-align: center;
    line-height: 1.4em;
    font-size: 88%;
    border-collapse: collapse;
    /* Timeless has display: none on .nomobile at mobile resolutions, so we
    * unhide it with display: table and let precedence and proximity win.
    */
    display: table;
}

/* Unfortunately, so does Minerva desktop, except Minerva drops an
* !important on the declaration. So we have to be mean for Minerva users.
* Mobile removes the element entirely with `wgMFRemovableClasses` in
* https://github.com/wikimedia/operations-mediawiki-config/blob/master/
wmf-config/InitialiseSettings.php#L16992
* which is why displaying it categorically with display: table works.
* We don't really want to expose the generic user in the wild on mobile to have
* to deal with sidebars. (Maybe the ones with collapsible lists, so that
* might be an improvement. That is blocked on [[:phab:T111565]].)
*/
body.skin-minerva .sidebar {
    display: table !important;
    /* also, minerva is way too aggressive about other stylings on tables.
    * TODO remove when this template gets moved to a div. plans on talk page
    * We always float right on Minerva because that's a lot of extra CSS
    * otherwise. */
    float: right !important;
    margin: 0.5em 0 1em 1em !important;
}
