## Modul:Clickable button 2/Doku

---

**Dies ist die Dokumentationsseite für Modul:Clickable button 2**

This module implements the [Vorlage:TI](#) template.

### Usage from wikitext

---

To use this template from wikitext, you should normally use the [Vorlage:TI](#) template. However, it can also be used with the syntax `{{#invoke:Clickable button 2|main|args}}`. Please see the template page for a list of available parameters.

### Usage from Lua modules

---

To use this module from other Lua modules, first load the module.

```
local mClickableButton2 = require('Module:Clickable button 2')
```

You can then generate a button using the `luaMain` function.

```
mClickableButton2.luaMain(args)
```

The *args* variable should be a table containing the arguments to pass to the module. To see the different arguments that can be specified and how they affect the module output, please refer to the [Vorlage:TI](#) template documentation.
