Inhaltsverzeichnis

Modul:Convert/sandbox

When making a change, copy the current modules to the sandbox pages, then edit the sandbox copies.

If wanted, use the purge link just above to update the following status report.

- Module:Convert • Module:Convert/sandbox • same content
- Module:Convert/data • Module:Convert/data/sandbox • same content
- Module:Convert/text • Module:Convert/text/sandbox • same content
- Module:Convert/extra • Module:Convert/extra/sandbox • same content
- Module:Convert/wikidata • Module:Convert/wikidata/sandbox • same content
- Module:Convert/wikidata/data • Module:Convert/wikidata/data/sandbox • same content

Use the following template to test the results (example `{{convert/sandbox|123|lb|kg}}`):

- Template:Convert/sandbox • invokes the sandbox modules and shows all warnings

Testscases:

- Module:Convert/sandbox/testcases • templates to be tested, with expected outputs
- Module talk:Convert/sandbox/testcases • view test results
- Template:Convert/testcases#Sandbox testcases • more tests

It is not necessary to save a module before viewing test results. For example, Module:Convert/sandbox could be edited. While still editing that page, paste

Vorlage:Nowrap

into the page title box under "Preview page with this template", then click "Show preview".

```
-- Convert a value from one unit of measurement to another.
-- Example: {{convert|123|lb|kg}} --> 123 pounds (56 kg)
-- See [[:en:Template:Convert/Transwiki guide]] if copying to another wiki.

        ------------------------------------------------------------------------
        -- Originally this function accepted x+y/z where x, y, z were any valid
        -- numbers, possibly with a sign. For example '1.23e+2+1.2/2.4' = 123.5,
        -- and '2-3/8' = 1.625. However, such usages were found to be errors or
        -- misunderstandings, so since August 2014 the following restrictions app
        --   x (if present) is an integer or has a single digit after decimal mar
        --   y and z are unsigned integers
        --   e-notation is not accepted
        -- The overall number can start with '+' or '-' (so '12+3/4' and '+12+3/4
        -- and '-12-3/4' are valid).
        -- Any leading negative sign is removed by the caller, so only inputs
        -- like the following are accepted here (may have whitespace):
        --   negative = false       false        true (there was a leading '-')
        --   text     = '2/3'       '+2/3'       '2/3'
        --   text     = '1+2/3'     '+1+2/3'     '1-2/3'
        --   text     = '12.3+1/2'  '+12.3+1/2'  '12.3-1/2'
        -- Values like '12.3+1/2' are accepted, but are intended only for use
        -- with the hands unit (not worth adding code to enforce that).

Modul:Convert/sandbox/Doku

Dies ist die Dokumentationsseite für Modul:Convert/sandbox

When making a change, copy the current modules to the sandbox pages, then edit the sandbox copies.

If wanted, use the purge link just above to update the following status report.

- Module:Convert • Module:Convert/sandbox • same content
- Module:Convert/data • Module:Convert/data/sandbox • same content
- Module:Convert/text • Module:Convert/text/sandbox • same content
- Module:Convert/extra • Module:Convert/extra/sandbox • same content
- Module:Convert/wikidata • Module:Convert/wikidata/sandbox • same content
- Module:Convert/wikidata/data • Module:Convert/wikidata/data/sandbox • same content

Use the following template to test the results (example `{{convert/sandbox|123|lb|kg}}`):

- Template:Convert/sandbox • invokes the sandbox modules and shows all warnings

Testscases:

- Module:Convert/sandbox/testcases • templates to be tested, with expected outputs
- Module talk:Convert/sandbox/testcases • view test results
- Template:Convert/testcases#Sandbox testcases • more tests

It is not necessary to save a module before viewing test results. For example, Module:Convert/sandbox could be edited. While still editing that page, paste

Vorlage:Nowrap

into the page title box under "Preview page with this template", then click "Show preview".
