## Modul:Module wikitext/Doku

Dies ist die Dokumentationsseite für [Modul:Module wikitext](#)

[Vorlage:Twinkle standard installation](#)

### Usage

This is an auxiliary module used to allow module pages to display wikitext. Use it by setting this module's text value to whatever content you want to display. The `_addText` helper method may be useful. For example, to tag a module with [Vorlage:TI](#), put `require('Module:Module wikitext')._addText('{{db-g7}}')` at the top of it.
