# Modul:Section link/Doku

---

## Dies ist die Dokumentationsseite für Modul:Section link

This module creates links to sections, nicely formatted with the "\$" symbol instead of the default "#".

| Inhaltsverzeichnis      |   |
|-------------------------|---|
| 1 Usage .....           | 2 |
| 1.1 From wikitext ..... | 2 |
| 1.2 From Lua .....      | 2 |
| 2 Examples .....        | 3 |
| 3 See also .....        | 3 |

## Usage

---

### From wikitext

---

From wikitext, this module should be used via the template Vorlage:TI. Please see the template page for documentation.

### From Lua

---

First, load the module:

```
local mSectionLink = require('Module:Section link')
```

You can then make section links via the `_main` function.

```
mSectionLink._main(page, sections, options, title)
```

Parameters:

- *page* - the page name to link to. Defaults to the full page name of *title*, or the current title if that is not specified.
- *sections* - an array of section names to link to, or a string to link to just one section name.
- *options* - a table of options. Accepts the following fields:
  - *nopage* - set this to true to avoid displaying the base page name in links.
- *title* - a default mw.title object to use instead of the current title. Intended for testing purposes.

All parameters are optional.

## Examples

---

| <b>Lua code</b>  | <b>Wikitext code</b>  | <b>Result</b>           |
|------------------|---|-------------------------|
| Vorlage:<br>Code | <code>{{section link Paris}}</code>                                       | Vorlage:Section<br>link |
| Vorlage:<br>Code | <code>{{section link Paris Architecture}}</code>                          | Vorlage:Section<br>link |
| Vorlage:<br>Code | <code>{{section link Paris Architecture Culture}}</code>                  | Vorlage:Section<br>link |
| Vorlage:<br>Code | <code>{{section link Paris Architecture Culture Sport}}</code>            | Vorlage:Section<br>link |
| Vorlage:<br>Code | <code>{{section link Paris Architecture Culture Sport nopage=yes}}</code> | Vorlage:Section<br>link |
