Syntax

Vorlage:Tlc

Full color of diagram palettes. Moving the mouse cursor over each box the color number appears.

Palette	Code	Resulting colors	Note
Category20 Vorlage:Small	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	Normal order
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	The first color is the 3rd
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	Inverted order
Category10 Vorlage:Small	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	Normal order Vorlage:Small
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	The first color is the 2nd Vorlage:Small
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	The first color is the 3rd Vorlage:Small
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	Inverted order
	Vorlage:Tlc	Lua-Fehler: bad argument #1 to "get" (not a valid title)	Normal order
	Vorlage:	Lua-Fehler: bad argument #1 to "get" (not a	

Palette	Code	Resulting colors	Note
Plotter	Tlc	valid title)	Inverted order

The *number of colors* must be from 1 to 20 (*Categ20*) or 26 (*Plotter*).

Show the color number is an optional parameter, with two values: '-' the color number and 'a' with the degree of transparency (*alpha channel*) added at the end of the number and always it will be 'ff'. It is only interesting to add the color for the *map coloring*.
