Pie charts

You can add a pie chart with a call to this template. This template uses the Vega version 2 JSON specification. **An older template** `{{Pie chart}}` is based on CSS rendering. The template `GraphChart` allows adding of map, line, bar and area charts, as well as stacked line, stacked bar and stacked area charts, but no pie charts. The [template GraphChart](#) also uses Vega version 2 and uses `Module:Graph` with Scribunto/Lua programming. This `Template:Graph:PieChart` doesn't use Lua.

Parameters

- **radius** specifies the radius of the pie chart in pixels, default is 100
- **legend** specifies the title to be displayed above the legend, default is "Legend". To hide legend, set it to a "-" value without quotes.
- **values** this is a list between square brackets of comma separated label value pairs between single curly braces like `[{"x": "Peaches","y": 100}, {"x": "Plums","y": 32}]`
- **rangeliteral** this can be one of the Vega specified rangeliterals, default is "category10", but can also be a list like `["red", "green"]`

Examples

Example usage:

```
{{Graph:PieChart|legend=Fruits|radius=125|values= [
    {"x": "Peaches", "y": 100},
    {"x": "Plums", "y": 32},
```

```

    {"x": "Blueberries","y": 80},
    {"x": "Strawberries","y": 46},
    {"x": "Bananas","y": 41}
  ]
}}

```
